# Arch of the Solstice & The Solar Altar

## The Zenith Ray & The Final Marker (Seal of Cairn V)

Before the monumental facade of Tower II stands the ceremonial Arch of the Solstice (Quadrant SE).
Directly aligned with Cairn V (The Final Marker) lies the circular Solar Altar fitted with a brass focal ring.
On the summer solstice noon, the sun's zenith beam passes cleanly through the archway's crown,
focusing directly onto the central seal socket of Cairn V to unseal the fifth and final talisman.

Zenith Ray Triangulation & Cairn V Activation:
1. Solstice Declination: +23° 27′ North.
2. Angular Incidence through Keystone: 90° − Latitude 30° 00′ = 60° Meridian Altitude.
3. Final Altar Inscription: «WHEN LIGHT RESTS UPON STONE, THE SEAL IS BROKEN.»
Result: [ SEAL OF CAIRN V EXTRACTED · ALL FIVE CAIRNS NOW ASSEMBLED IN THE SATCHEL ]
