The Camera Obscura

A dark room with one small hole in its wall. Through the hole the whole city of the third tower falls on the wall, upside down. This is the city as it stood the day before the raiders came, drawn the way the wall shows it: upside down.

Keep this sheet beside you. In the dark room the city is turned the same way, and four things in it have changed since this drawing was made. Find them. The raiders carry their fire wherever they go.

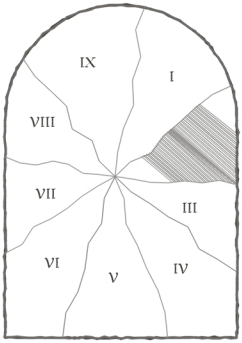

Look at the sky, the roofs, the shutters and the street.

Fragment II

The second piece of the mirror of Tower III. It is yours when the room opens.

Its place in the mirror

The seal of this room. Scan it with your camera when the door asks for it.
